6 BUSINESS INSIGHTS

- Machine Learning
- Artificial Intelligence (AI)
- Power Platform
 - Power BI
 - Flow
 - Power Apps

1

MICROSOFT CLOUD

- Microsoft Maintained Infrastructure
- Active Directory Security - Same as O365
- Security Monitoring & Threat Management by Microsoft
 - Intrusion detection
 - Penetration testing
- Scalability
- Consistent Upgrades
- Automatic Backups
- No need for hardware or system maintenance

2

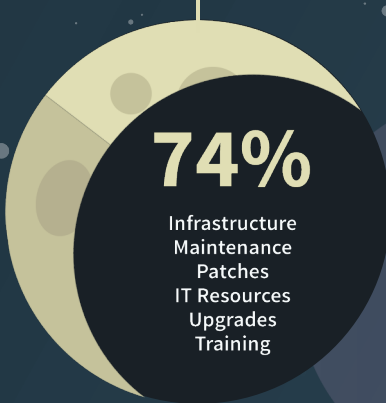

COST OF OWNERSHIP MORE VISIBILITY

Less time spent on maintenance and infrastructure frees up your workforce to do more. A cloud model provides more visibility into the hard costs or operating expenses of your solution and a more predictable cost over time.
