

## About

Concurrency helps clients leverage technology to improve their businesses. It is a Microsoft Gold Partner, multiple-time Microsoft Partner of the Year winner, ServiceNow Elite Partner and recently earned four 2020 Microsoft Partner Awards for its success driving client outcomes leveraging Azure, artificial intelligence and machine learning. Founded in 1989, Concurrency is headquartered in Brookfield, WI with additional offices in Chicago, IL and Minneapolis, MN. It was recently named to the Inc. 5000 Fastest Growing Private Companies in America list for the fifth time.

## Approach

Concurrency is an organization of Change Agents - inspired technologists who challenge the status quo, create value and deliver business outcomes. Concurrency specializes in Organizational Change Management because it is a critical component of successful technology projects and develops long-term relationships with clients because its business outcome-based approach is proven to drive results.

## How Concurrency Helps You Leverage Technology to Drive Business Outcomes

## About

Concurrency is an organization of Change Agents. Our inspired technologists challenge the status quo, create value and deliver outcomes. A Microsoft Gold Partner and multiple-time Microsoft Partner of the Year winner, Concurrency specializes in organizational change management to maximize impact and develops long-term client relationships because our business outcome-based approach drives results.

## Manufacturing Expertise

Concurrency specializes in helping manufacturers leverage technology to increase revenue and profits. It was named the 2020 Microsoft US Partner - Manufacturing Industry and a 2020 Microsoft Partner of the Year Global Finalist - AI & Machine Learning for helping manufacturers improve efficiency, drive innovation and create scalable, resilient supply chains.

## Concurrency Manufacturing IP Solutions

Concurrency has developed the following Manufacturing IP Solutions to maximize the impact of your investments:

Demand & Inventory Forecasting • Inventory Location & Shipping Optimization • Small Customer Demand Prediction • Flash Quoting with Intelligent Agent • Flash Quote Bot Framework • Predictive Maintenance Manufacturing Framework • Product Picking AI • Product IoT Framework • Product Catalog and Customer Usage

Each offering includes a simple path to execution: Project Kickoff Workshop → Pilot Project → Project Implementation

## Business Outcomes and ROI

### Create a More Resilient Supply Chain

Azure Machine Learning and Kubernetes Services, Databricks and Power BI can help you better predict demand, improve forecast accuracy and optimize inventory levels and location.

ROI: Lower inventory costs, reduced shipping costs.

### Build More Agile Factories

Azure Machine Learning, Kubernetes Services, IoT, Synapse and Bot Framework can help you transform product picking operations and optimize predictive maintenance.

ROI: Reduced manufacturing costs/hour, maintenance costs and production downtime.

### Engage Customers in New Ways

Azure Machine Learning, Kubernetes Services, Synapse and Bot Framework can help you improve how and the speed at which you engage customers from the point of inquiry to delivery.

ROI: Increased revenue due to improved responsiveness and customer service.

### Unlock Innovation and Develop New Services

Azure IoT, Sphere, Synapse and Machine Learning provide better information to identify innovations and surface "smart" product opportunities to increase market share or help you enter new markets.

ROI: Price increases as smart products command price premium and sales lift from product innovations.
